

## DRAWING PLANS

- Accurate scale drawings should accompany all applications. These should be at a scale of at least 1:50.
- Drawings on a smaller scale (1:100, 1:200 or 1:500) will only be accepted where this is necessary due to the size of the building. A useful rule of thumb as to when smaller scale drawings would be acceptable is where elevations or floor plans at 1:50 would not be able to fit onto A1 drawing paper. In any case smaller scale drawings would also need to be accompanied by drawings of details at a scale of at least 1:50.
- There should be drawings and plans of the EXISTING AND PROPOSED situation.
- Plan Drawings should show the whole of the property.
- It may also be necessary to see the proposal in relation to neighbouring buildings. These should therefore also be shown.
- All drawings in your planning application should be given a unique number e.g. 12/3.
- Any revisions to these drawings should be clearly identified with a new number or letter e.g. 12/3. A.
- All drawings should have a title. i.e. 'Proposed First Floor Plan' or 'Existing Front Elevation'
